

GESTATIONAL DIABETES MANAGEMENT REPORT

SAMPLE / NOT A REAL PATIENT

PATIENT NAME Rebecca Levy	MRN DEMO-002	DOB Nov 3, 1989	EDD Sep 28, 2026	GESTATIONAL AGE 34w 5d
GRAVIDA / PARA G3P2002	VISIT DATE Aug 22, 2026	REFERRING OB/GYN Dr. Priya Shah	OB PRACTICE Pacific OB/GYN	

GDM CLINICAL SUMMARY

FOLLOW-UP VISIT

GESTATIONAL AGE
34w 5d

CURRENT THERAPY
Basaglar 5 units QHS

KEY GLUCOSE PATTERN
Persistent fasting elevations

BREAKFAST
0/7 above goal — 0%

DINNER
2/7 above goal — 29%

GDM CLASSIFICATION
A2GDM — medication controlled

GLUCOSE REVIEW PERIOD
Last 7 days

FASTING
5/7 above goal — 71%

LUNCH
0/7 above goal — 0%

OVERALL CONTROL
75% of readings at goal

PLAN TODAY

Continue fasting and postprandial monitoring
Reinforce carbohydrate distribution and post-meal activity

Increase documented bedtime insulin regimen
Review glucose log in 1 week

MEDICATION CHANGE TODAY
Increase Basaglar to 7 units QHS

NEXT FOLLOW-UP
Aug 30, 2026

Clinical summary is decision support only; treatment decisions remain clinician-entered and approved.
